

Passive Galvanic Barrier

STI - PGB2 is a passive galvanic barrier. Basic advantages of the module are high accuracy and two-way signal transmitting, allowing connection to smart transmitters working with HART protocol.

Technical Data:

- input
4 – 20 mA
- output
4 – 20 mA
- isolation
2500 V RMS
- gain
1
- accuracy
0,1 %
- enclosure
Phoenix EG 22,5 IP 40
